

The Brittons Academy Examination Results 2016

In 2016 the Government changed the way that schools' examination results are measured. The new measures focus on the grades in eight key subjects and include every student's results.

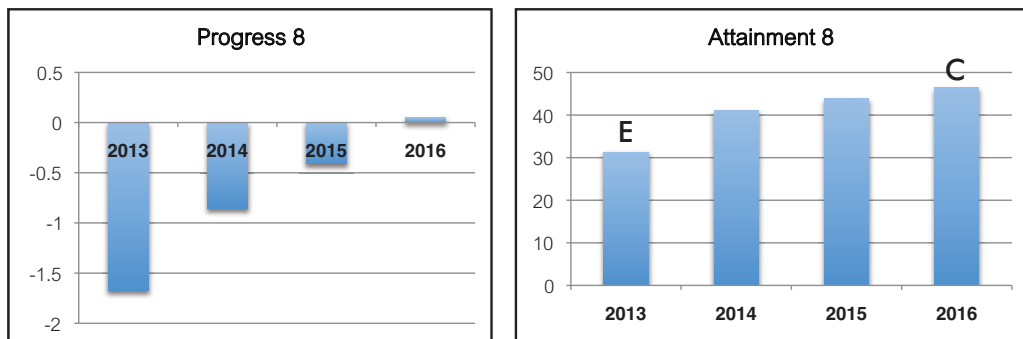

- **Progress 8:** This measures how much progress has been made during the five years at secondary school in 8 key subjects. In effect, it measures the value added by the school. A score of 0 indicates that students have achieved the grades expected of them.
- **Attainment 8:** This is the average grade achieved across the same 8 key subjects.

In terms of both these new measures, Brittons has once again achieved the best results in recent years.

2016 GCSE Results:

- Progress 8: 0.02
- Attainment 8: 4.67 (Grade C-)
- %A*-C English: 74%
- %A*-C Maths: 58%
- %A*-C English & Maths: 48%

Exam Results Over Time:

The Academy is a rapidly improving school, as shown by the charts above.

- Our Progress 8 Score has improved significantly over the past four years. On average, students are now performing just above the level expected of them given their starting point in Year 7.
- Our attainment 8 score has also improved significantly, from an average grade E in 2013 to a grade C- in 2016.

We are committed to improving the results of every student at the Academy and expect the progress shown above to continue into the future.
